

STEP DECK TRAILER

Step deck trailers, also known as drop decks, are designed to transport products which are too tall for a standard flatbed. The trailer consists of two decks, the upper and lower. The use of the lower deck, or well, allows for freight up to 10' high to be legally transported, while still providing the same loading / unloading capabilities of a standard flatbed.

STEP DECK SEMI TRAILER DIMENSIONS		STEP DECK TYPICAL CARGO MAXIMUMS	
Length: Total	48' - 53'	Cargo Width	102"
